

Catalogue of current “Biblioteche per la PA” serial publications

This catalogue includes over 1800 current serial publications (journals, magazines, newspapers, etc.) which can be found in the libraries of the Regional Councils of Emilia Romagna*, Lombardia*, Marche*, Tuscany* and Umbria*, by Formez* library in Rome, IRER*, IRPET* and the Province of Perugia’s libraries which participate in the Bibliothecaurus project.

For current serial publications we intend the publications received by the above mentioned libraries on subscription, donation or exchange, on a regular basis. Serials are listed in alphabetical order and for each of them, bibliographic data as well as information about location and archives of each library, are included.

Search is possible through the use of the “Find” and “Next” keys by typing the term to look for or, in alternative, by browsing through the terms up to the serial desired.

** Data regarding those libraries marked with an asterisk, have been updated on June 2008; as for the Library of the Regional Council of Emilia Romagna, only the serial publications from 2005 onwards have been inserted while ceased or closed serials have not been cancelled from the list.

Each catalogue card reports:

- **Bibliographic information**
publication title and sub-title when needed, in order to distinguish two titles which are identical or to render a not very significant title clearer (e.g.: D & L: critical magazine on labour law); publisher or author when the latter is also publisher; a link may be provided to access information about the magazine or its full-text. Historical notes about the publication may be included (e.g.: it could be indicated if a magazine has not been published for a certain period of time or if it is the continuation of another magazine under a different title)
- **Location and holdings information**
Holdings information are provided for each library: it’s indicated the year in which a specific journal started the publication of reference without interruptions; an indication such as “lac.” (abbreviation for “lacunoso”, namely “lacking”) followed by the date of publication, outlines that certain journals published in the year of reference are lacking (e.g.: “lac. 1976, 1989” means that some issues of 1976 and 1989 are missing). The words “manca”/“mancano” (“missing”) followed by the years of reference, outline that all the issues referring to certain years are missing. The indication “sc.” for the Library of the Regional Council of Tuscany states that a journal lacks nearly in half the issues published during a certain year. The indication Mag for the Library of the Regional Council of Emilia Romagna and (BR) for Lombardia, specifies that part of the holdings is stored in the library archives.

ARCHIVIO DI STUDI URBANI E REGIONALI

Franco Angeli

Not published in 1979
